

INFORMATION MANAGEMENT SOLUTIONS

Prolifics can help you leverage one of your organization's key assets—information. With sophisticated information management tools, you can deliver trusted information throughout your enterprise, making it available to your employees, partners and customers in real time. Using this insight enables you to better analyze data, identify breakdowns and make better decisions that will optimize your business. With industry leading IBM technologies, our experts have the experience necessary to solve even the most challenging information management needs, making critical information available across your enterprise.

By enhancing the quality, availability and integrity of your company's information, your organization has the power to use information effectively. Prolifics works with organizations across all industries to help share complete and trusted information across the enterprise, to integrate scorecards, dashboards and reports into your IT infrastructure and to help automate processes and orchestrate workflow around essential content. Our experts can examine your business needs and help you maximize your return on investment in information management, improving your company's performance while reducing costs.

“Our sales organization was unsure as to what the best solution would be to address their sales reporting and budgeting requirements and through our partnership with Prolifics, we have been able to deliver a feature rich, easy to use, TM1 solution.”

— Kris Munson, Watts Water Technologies

Prolifics' Expertise in Information Management

Business Analytics

Use information to your organization's advantage, helping you grow and compete in any industry. With the ability to identify, extract and analyze critical business data, your employees are better equipped to make better and faster decisions. Leveraging leading IBM Cognos technologies, Prolifics helps you establish a proactive business intelligence strategy, allowing your company to enhance performance and improve operational efficiency. IBM Cognos Business Intelligence software brings you an overall perspective of your business and provides you with a better understanding of your performance. With Cognos Financial Performance Management (TM1), drive profit and growth with superior budgeting, forecasting, consolidating and reporting capabilities.

Advanced Case Management

Prolifics' Advanced Case Management solutions unify an organization's information, processes and people to provide a complete view of cases. With IBM technology for processes, analytics, business rules, collaboration and social, you're ready to manage important case information and share it with the right people across your enterprise, helping deliver better insight, flexibility, customer service and regulatory compliance. With IBM Case Manager, capable of automating business processes, Prolifics can implement an integrated case management solution that allows you to handle growing, increasingly complex caseloads, improving overall efficiency and reducing cost.

Document Management and Workflow

For powerful document management, Prolifics provides solutions that allow you to control content and automate processes. With the ability to capture, store, manage, integrate and deliver information across your enterprise, you can improve control of your organization's complex and unstructured content. Prolifics delivers comprehensive solutions for document management and workflow with IBM FileNet, allowing your employees to process work faster while significantly reducing processing costs.

Get Started With Prolifics

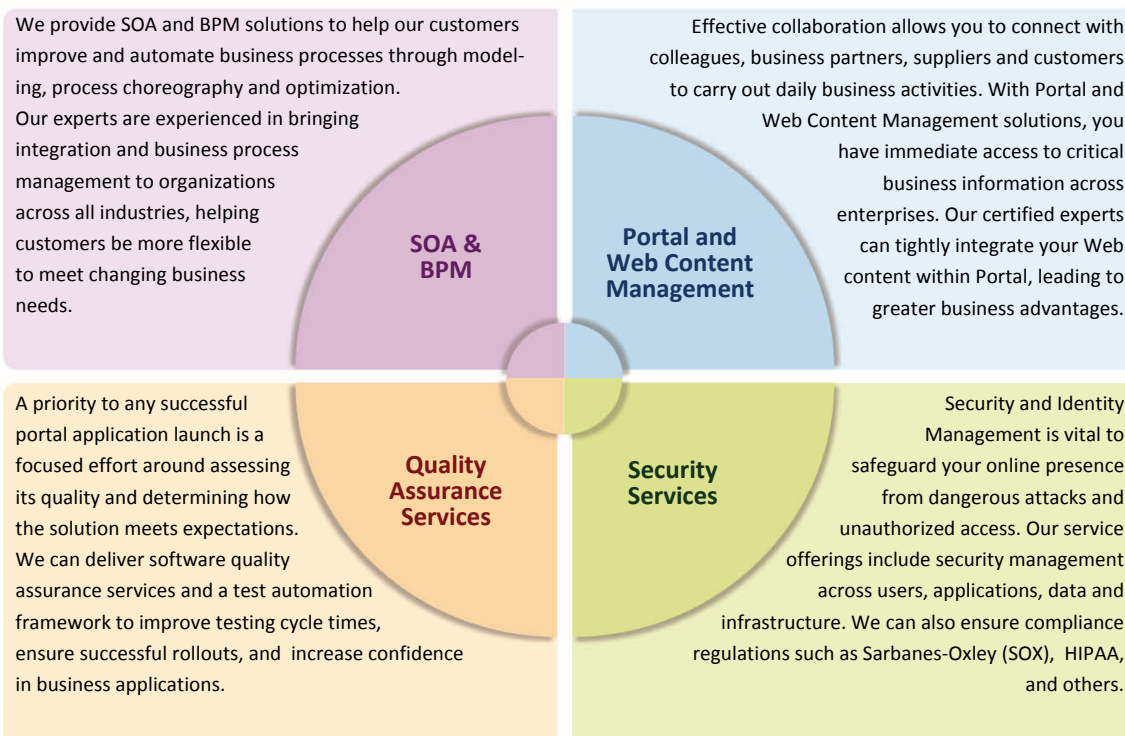

Discovery Call

- ◆ Join a 30-60 minute consultative call with Prolifics' information management experts to evaluate your company's business requirements and current infrastructure.
- ◆ The call is designed to outline a strategy for moving forward with an information management solution in order to achieve your overall goals.

Health Assessment

- ◆ Prolifics' subject matter experts will perform a comprehensive assessment of your information management strategy ranging from data analytics to advanced case management to document management and workflow.
- ◆ During this assessment, Prolifics will work with you to provide a complete view of your infrastructure and develop a rollout plan aligned with your information management goals.

About Us

Prolifics is the largest systems integrator specializing in IBM technologies. Having garnered awards for its solutions and technical excellence across IBM's entire software portfolio, Prolifics provides expert services including architectural advisement, design, development and deployment of end-to-end SOA, Portal and Security solutions. SemanticSpace, Prolifics' parent company, is a global IT services firm providing application development, testing, application maintenance and outsourcing services. Bringing over 30 years experience and a strong global presence across US, Europe and Asia, the SemanticSpace companies offer end-to-end services combined with the market's most seasoned and skilled consultants and the dedicated care and attention that comes from a highly-specialized, boutique company. By combining application frameworks, prebuilt components, custom development expertise, a governance framework and a blended shore model, we help organizations decrease risk in complex software development and deployment investments, improve time to market and increase success of business strategy execution.
