

# Prolifics Health & Security Assessment for WebSphere MQ

To keep up with business demands today, many organizations find it essential to operate on an infrastructure that is flexible and enables rapid responses. IBM WebSphere MQ provides a messaging backbone that connects virtually any IT system. The leading universal messaging foundation provides reliable communication and integration services for IT infrastructures and SOA implementations, helping seamlessly bridge to new technologies. By improving the flow of information across an enterprise, and allowing that information to adjust in the face of dynamic business requirements, MQ helps organizations around the world to increase business agility while reducing IT maintenance and integration costs.

With the security and availability of your data at stake, let Prolifics' WebSphere MQ experts provide a Health and Security Assessment designed to test and review the security and performance of your MQ implementation. After the analysis, which covers Performance, Compliance, Security, Availability, Disaster Recovery, Monitoring, Scripts/Automation and Upgrades, a report will be delivered to you detailing the findings and providing high level recommendations.

## Assessment Features

Prolifics' certified MQ Solution Architects will provide a **MQ Health and Security Assessment** which typically includes the following activities:

- ◆ Implementation review
- ◆ Check for security gaps/issues
- ◆ Analyze performance and throughput
- ◆ Examine Queue Manager configurations and error logs/files
- ◆ Review any outstanding PMRs
- ◆ Check version usage and upgrade options/efforts

**Deliverables:** Summary report outlining findings and high level recommendations. A Prolifics MQ Architect will step through this report with you.

**Length of Engagement:** 1 day of analysis (Completed report will be delivered soon after)

**Pre-Requisites:** Access to your architect(s) familiar with your WebSphere MQ Infrastructure and Implementations

**How to get started:** The first step is a 15-30 minute discovery call to understand your current situation, identify the areas Prolifics will focus on during the engagement and determine if you qualify for a free WebSphere MQ Health and Security Check.

**corporate headquarters:**  
114 West 47th Street  
New York, NY 10036 USA
